

PEDIATRIC HISTORY FORM

PATIENT DEMOGRAPHICS

Child's Name: _____ Age: _____ Today's Date: ___/___/___
DOB: ___/___/___ At birth: Height: _____ Weight: _____ Weeks gestation: _____ Labor hrs: _____
Gender: M F Phone (Home) _____ Current Height: _____ Current Weight: _____
Address: _____ City: _____ State: _____ Zip: _____
Email Address: _____
Mother's Name: _____ DOB: ___/___/___ Mother's Mobile: _____
Father's Name: _____ DOB: ___/___/___ Father's Mobile: _____
Pediatrician/Family MD _____ Last Visit: ___/___/___
Reason for visit: _____ Any previous chiropractic care? Yes No
Referred by: _____ Vaccinations: Yes No Delayed
Please list any medications: _____

CHILD'S CURRENT COMPLAINT:

Reason for seeking care: _____ Wellness Check-up _____ Injury or Accident _____ Other

Please explain: _____

If your child is experiencing Pain/Discomfort please identify where and for how long

1. **When did the** Problem first begin? Date ___/___/___ _____ Unknown _____ Gradual _____ Sudden

2. **Ever had** this problem **before**? ___ No ___ Yes If yes, when? _____

3. Any **bowel or bladder** problems since this problem began?: If yes, describe:

4. Have you seen any **other doctors** for this problem? ___ No ___ Yes If yes, who and when?

5. What were the results of past treatment? _____

6. How is this problem **NOW?**: Rapidly Improving Improving Slowly About the Same

Gradually Worsening On & Off

7. Please list any **medication taken** for this problem: _____

8. Has your child ever sustained an injury playing organized sports? ___ No ___ Yes If yes; please explain:

9. Has your child ever sustained an injury in an auto accident? ___ No ___ Yes If yes; please explain:

10. Location of birth: Hospital Birthing Center Home OBGYN/Midwife: _____

11. Birth: Vaginal w/epidural Natural w/o epidural C-section Were forceps or vacuum used? _____

12. How was the pregnancy? (Complications, Ultrasounds, etc.) Please explain: _____

13. How was the child's birth process? Please explain: _____

Allergies to _____

Other: _____

I understand that I am directly and fully responsible to Limitless Chiropractic for all fees associated with chiropractic care my child receives.

The risks associated with exposure to ionization and spinal adjustments have been explained to me to my complete satisfaction, and I have conveyed my understanding of these risks to the doctor. After careful consideration I do hereby request and authorize imaging studies and chiropractic adjustments for the benefit of my minor child for whom I have the legal right to select and authorize health care services on behalf of.

Under the terms and conditions of my divorce, separation or other legal authorization, the consent of a spouse/former spouse or other guardian is not required. If my authority to so select and authorize this care should change in any way, I will immediately notify this office.

Informed Consent

We encourage and support a **shared decision-making process** between us regarding your health needs. As a part of that process, you have a right to be informed about the condition of your health and the recommended care and treatment to be provided to you so that you can make the decision whether or not to undergo such care with full knowledge of the known risks. This information is intended to make you better informed in order that you can knowingly give or withhold your consent.

Chiropractic is based on the science which concerns itself with the relationship between structures (primarily the spine) and function (primarily of the nervous system) and how this relationship can affect the restoration and preservation of health.

Adjustments are made by chiropractors in order to correct or reduce spinal and extremity joint subluxations. **Vertebral subluxation** is a disturbance to the nervous system and is a condition where one or more vertebra in the spine is misaligned and/or does not move properly causing interference and/or irritation to the nervous system. The primary goal in chiropractic care is the removal and/or reduction of nerve interference caused by vertebral subluxation.

A chiropractic examination will be performed which may include spinal and physical examination, orthopedic and neurological testing, palpation, specialized instrumentation, radiological examination (x-rays), and laboratory testing.

The chiropractic adjustment is the application of a precise movement and/or force into the spine in order to reduce or correct vertebral subluxation(s). There are a number of different methods or techniques by which the chiropractic adjustment is delivered but are typically delivered by hand. Some may require the use of an instrument or other specialized equipment. In addition, physiotherapy or rehabilitative procedures may be included in the management protocol. Among other things, chiropractic care may reduce pain, increase mobility and improve quality of life.

In addition to the benefits of chiropractic care and treatment, one should also be aware of the existence of some risks and limitations of this care. The risks are seldom high enough to contraindicate care and all health care procedures have some risk associated with them.

Risks associated with some chiropractic treatment may include soreness, musculoskeletal sprain/strain, and fracture. Risks associated with physiotherapy may include the

preceding as well as allergic reaction and muscle and/or joint pain. In addition there are reported cases of stroke associated with visits to medical doctors and chiropractors. Research and scientific evidence does not establish a cause and effect relationship between chiropractic treatment and the occurrence of stroke; rather, recent studies indicate that patients may be consulting medical doctors and chiropractors when they are in the early stages of a stroke. In essence, there is a stroke already in process. However, you are being informed of this reported association because a stroke may cause serious neurological impairment.

I have been informed of the nature and purpose of chiropractic care, the possible consequences of care, and the risks of care, including the risk that the care may not accomplish the desired objective. Reasonable alternative treatments have been explained, including the risks, consequences and probable effectiveness of each. I have been advised of the possible consequences if no care is received. I acknowledge that no guarantees have been made to me concerning the results of the care and treatment.

I HAVE READ THE ABOVE PARAGRAPH. I UNDERSTAND THE INFORMATION PROVIDED. ALL QUESTIONS I HAVE ABOUT THIS INFORMATION HAVE BEEN ANSWERED TO MY SATISFACTION. HAVING THIS KNOWLEDGE, I KNOWINGLY AUTHORIZE

TO PROCEED WITH CHIROPRACTIC CARE AND TREATMENT.
